

CITIZENS' FACTS: Know them and Act.

- 1.- The United States will be downgraded because of Obama's failed policies that resulted in excess spending and indebtedness that have tainted the "US Brand" credit ratings premium.
- 2.- The Republican Plan is the ONLY Plan that provides true, feasible, and long-lasting SOLUTIONS to this administration's chronic spending spree and capricious strategy to raise taxes.
- 3.- Democrats will NOT accept any plan that keeps them honest and that includes provisions to change the dysfunctional status quo of entitlement programs or that limits their ability to exchange tax-payer funded handouts for special-interest votes.
- 4.- The "Debt Ceiling Debate" was politicized from the start by the President, who tried to use this juncture to once more try raise taxes on whom he insidiously describes as "the rich".
- 5.- "Shared sacrifice", "millionaires and billionaires", "corporate jet owners", "yacht owners", "rich people paying lower taxes than their secretaries" are all demagoguery and talking points designed to pressure the American People into approving a segmented tax increase to fund the Democrat's out-of-control spending while maintaining the waste, duplicities, and inefficient and unviable programs.
- 6.- The Republican "Cut, Cap and Balance (CCB)" Plan effectively forces the administration to reduce or eliminate wasteful spending, to start operating within the parameters of fiscal means, and to create a Constitutional obligation to reach and maintain balanced fiscal budgets. These three factors have been mismanaged by the current administration and only by solving them will we recover our "US Brand" credit premium.
- 7.- The Republican CCB and Ryan Plans are the ONLY plans on the table that provide a clear, objective, and practical path to economic growth and recovery.
- 8.- Fiscal and Economic soundness (as pursued by Republicans) will provide certainty to the markets and more importantly, to employers that will rely on such stability to start implementing hiring practices again.
- 9.- Democrats oppose fiscal responsibility, a lean and efficient government, and functional and viable entitlement reform because it is in their best interest to maintain an oppressed and dependent voters' base.
- 10.- Democrats mislead the American People by blaming past administrations for the excesses of the current government. They refuse to take responsibility for the failed policies of the present and they deny Americans the benefit of fundamentally solving the issues.
